FREWARE

TSPLUS MOBILE APP

CONNECTING THE WORLD

Working in the cloud... wherever you are, whenever you want.

With the TSplus Remote Desktop app, your Windows Applications are available **anywhere in real time. All you need is an internet connection.**

The App can build up any number of connections simultaneously to different sites and servers. With just one click, you are connected to the server in New York; with another click, you start your CRM app in Los Angeles.

From smartphone...

To workstation...

Mobility = Success

All end devices are compatible with the same unlimited functionality for the same operations!

Download Links:

[Android \(GooglePlayStore\)](#)

[iOS \(Apple AppStore\)](#)

[Windows](#)

[Debian](#) and [Linux](#) Versions

TSplus Apps are available for all major operating systems as web or native apps.

- ✓ After a quick download, your devices are ready for use within a few minutes.
- ✓ Easily print any document and photo you need on the nearest local printer.
- ✓ Use TSplus 2FA to secure your web server

The TSplus App is free and has 2 pre-requisites:

- The host site must be a TSplus Mobile Web or Enterprise system.
- The 11.30 or newer release must be installed on this host: [Download the latest version.](#)

Enjoy the easiest remote access from any place and any device where you have an Internet connection and a standard WEB browser. Use the TSplus mobile App to connect faster from Smartphone and tablets.

ENTERPRISE Edition:

Benefit from the full range of TSplus technologies, as well as a Gateway Portal to access multiple TSplus systems and a unique load-balancing system combined with an efficient Servers Farm Manager.

ENTERPRISE PLUS Edition:

Get the ultimate Remote Desktop package gathering all TSplus products in one integrated solution: remote access with security, printing and monitoring.

COMPANION TOOLS

TWO FACTOR AUTHENTICATION

ADD AN EXTRA LAYER OF SECURITY TO YOUR TSPLUS WEB PORTAL!

(Only with MOBILE WEB and ENTERPRISE, included as a 30-DAY TRIAL, 30 USERS!)

TSplus 2FA allows you to use your mobile device to access your remote session securely and conveniently.

Relying on just usernames and passwords to secure your online accounts is no longer considered safe.

Your employees are using TSplus to work from home, using their own devices to share personal and corporate data online, and then using those same devices for social media and other less secure communications and transmissions.

If you're an admin responsible for cybersecurity in a large organization, **you need to respond to this increased threat with efficient methods.**

All it takes is one weak link in the chain, one impatient or exhausted employee, to leave your organization vulnerable to attack.

TSplus 2FA is your key to a secure world.

By providing dynamic passcodes and multi-factor authentication, this add-on is the identity and access tool you need to secure your corporate network or your own personal data.

TSplus 2FA prerequisites on the user side:

- A personal portable device, such as a Smartphone.
- An authenticator app installed on this device. The following apps can be used to proceed:
 - [Authy](#)
 - [Google Authenticator](#)
 - [Microsoft Authenticator](#)

COMPANION TOOLS

✓ Easy To Install and Use

Totally driverless

Just Enable TSplus 2FA and add the users and groups you wish to use this method connect to your Web Applications Portal.

It is a two steps verification process:

- **One:** At the first connection to the Web Portal, users will need to enter their phone number or scan a QR code to configure the authentication method (SMS or App) and authenticate his device.
- **Two:** At every future connection, users will need two pieces of information: their credentials and the authentication code automatically generated on their mobile device.

✓ Easy To Configure and Manage

Complete dashboard and many options

In the 2FA tab of the AdminTool, the Administrator can handle all credentials resets in just a few clicks.

You can easily configure users, choose the verification method (per user), manage SMS settings and test the feature directly. **It is simple, flexible and powerful!**

✓ Extra Layer of Security

Drastically reduce the risk of hacks!

Build strong and frictionless passwords **for your TSplus Web Application Portal.**

With a single touch, users can generate dynamic and one-time number combinations (the verification codes are generally reset every 30 seconds) to supplement static usernames and passwords for added security.

So even if the passwords are acquired, they cannot be reused or sold.

✓ Available Offline & Multiplatform

Accessible on Multiple Devices

Get two-factor authentication on your device **without any extra hardware.**

Users can authenticate using generated passwords on their device even when those devices are offline. Picking between SMS or Authenticator App allows compatibility with any mobile OS!

TSplus 2FA license is valid per server!!

COMPANION TOOLS

TSPLUS ADVANCED SECURITY

THE PERFECT TOOL TO SECURE YOUR TSPLUS' REMOTE SERVERS!

TSplus Advanced Security offers cutting-edge functionalities and makes the use of remote access in your daily routine as safe as possible.

Most organizations assume that the hackers who threaten them will be motivated by the value of the information the company uses to provide its services. The truth is that cyber criminals don't necessarily care about the value of corporate, personal and/or financial data. Many attacks are perpetrated on systems because there's value in the processing power of the systems themselves.

As Windows infrastructures grow and evolve, it gets more and more difficult for security experts to see all the endpoints in their architecture. **And you need to know your Remote Desktop vulnerabilities to mitigate your risk.**

TSplus **Advanced Security** consists of a robust and integrated set of security features to protect against these Remote Desktop attacks. This software approach combines advanced technology as well as the latest lessons and insights our elite team of Remote Desktop cyber security specialists brings back from real-world missions.

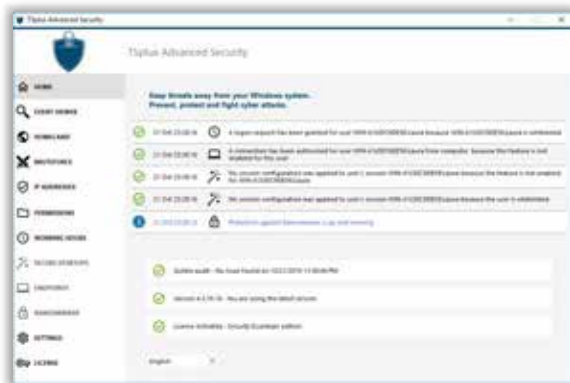

TSplus Advanced Security is available in two editions:

- **SECURITY ESSENTIALS:** the best package to keep your Remote Desktop connection safe, with powerful protection features. It is the low-cost security solution you can even apply to all W7/W10 Pro RDP accesses.
- **ULTIMATE PROTECTION:** the security tool every Windows Server administrator "Must Have": it provides everything you need to effectively protect your user environment and prohibit malicious actions.

COMPANION TOOLS

*THE 360 DEGREE APPROACH TO SECURITY
INCLUDED IN TSPLUS AS A TRIAL VERSION*

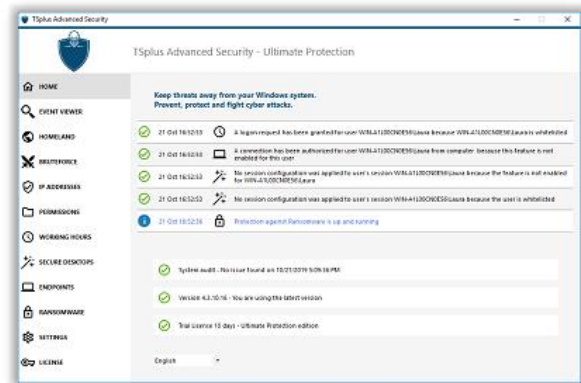

SECURITY ESSENTIALS EDITION

Included Features:

- ✓ **Homeland Protection:** Prevent attackers from opening a session.
- ✓ **Prevent brute-force attacks:** Blacklist the offending IP addresses.
- ✓ **Working Hours restriction:** Prohibit users to connect at night (for all users).
- ✓ **Permissions:** Quickly *inspect* access rights per users & groups of users.
- ✓ **IP Management:** All IPs information detected by *Homeland* and *Brute-Force* protections to manage from one place.
- ✓ **Events Log:** Displays the last 2500 events.

ULTIMATE PROTECTION EDITION

Included Features:

- ✓ **All features from the SECURITY ESSENTIALS Edition.**
- ✓ **Ransomware protection:** Immediately detect ransomware attacks and stop data encryption.
- ✓ **One click to Secure Desktop:** Provide a highly secure user environment (per user or per group).
- ✓ **End-Point Device Protection:** Restrict access per device (per user).
- ✓ **Permissions:** Quickly *inspect and Edit* access rights per users & groups.

*IT JUST WORKS OUT OF THE BOX AND DISPLAYS THE MOST USEFUL DATA EXTRACTED FROM YOUR SERVER. WITH **TSPLUS ADVANCED SECURITY** YOU CAN LOG IN TO YOUR SERVER FROM ANYWHERE, AT ANY TIME, WITHOUT FEAR OF EXTERNAL ATTACKS.*

COMPANION TOOLS

VIRTUAL PRINTER

INSTANTLY PRINT FROM YOUR REMOTE SESSION TO YOUR LOCAL PRINTER!

Virtual Printer is the convenient remote printing solution to setup on your server:

- Driverless.
- Zero configuration.

Every day, organizations of all sizes need to securely print from one location, such as a main office, to another remote location that isn't on the same network or even in the same country.

The Virtual Printer enables direct printing from any remote environment to the local printer of your choice.

The user prints using the same method as if working in local. Two clicks and it is done!

Virtual Printer comes in two parts, one to install on the server and one to the client side.

The *Virtual Printer* detects and maps the list of local printers to the server exactly as if they were directly plugged on it. Thus, the printing process is completely seamless for the user.

- ✓ *TSplus Virtual Printer is bound by your organization' security:* Print any file securely stored on your corporate network with the guarantee that your data stay safe.
- ✓ *TSplus Virtual Printer works flawlessly:* by reducing printing data volume, it speeds up data transfer for a fast and high-quality printing job!
- ✓ *TSplus Virtual Printer is the flexible Remote Printing solution* which adapts to your needs to save you time and money: compatible with most Remote Desktop software, it supports all brands of printer and works both in single and multi-users environments!

Provide immediate, secure and reliable Remote Printing to your users.

COMPANION TOOLS

SERVER GENIUS

ALL YOU NEED TO KNOW ABOUT TSPLUS OPERATIONS!

Server Genius is the easiest reporting solution to setup on your server:

- 30 second setup.
- Fast configuration.

Server Genius gives you facts and data about your servers, applications and users.

Monitor all your server and website activities in one interface!

Reveal important audit information about applications and determine the most frequently used applications on your RDP host server.

Monitor the total time users spend using a specific app. Measure bandwidth usage, be aware of a server failure, gain important information for future network upgrades, and much more.

Detailed application usage tracking helps identify the most intense activity periods per application and per user.

COMPANION TOOLS

MONITOR YOUR SERVERS AND WEBSITES FROM YOUR WEB BROWSER!

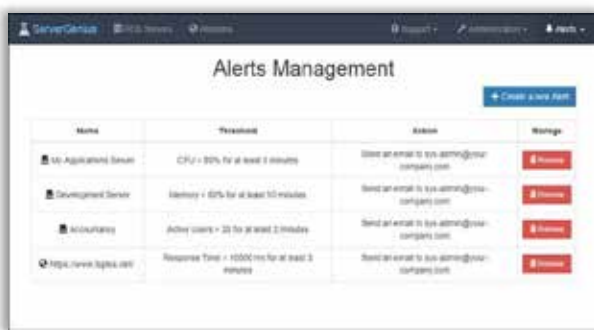

INCLUDED IN TSPLUS AS A TRIAL VERSION

Server Genius performance and application analytics instantly alert IT teams to abnormal or suspicious user activity.

Performance and usage analytics generated by *Server Genius* allow alerts to be based on chosen events that occur during a date-range.

Customize alerts with thresholds & time-ranges.

These alerts generate emails and notifications by browser pop-ups so administrators can react quickly to potential problems. Access the reports anywhere anytime with our user-friendly web application, compatible with tablets and smartphones.

Receive real-time alerts from anywhere in the world and troubleshoot important issues faster!

Server Genius is available in three editions:

- **Server Genius ESSENTIALS:**
Monitor 1 server and 1 website.
- **Server Genius STARTUP:**
Monitor 5 servers and 5 websites
- **Server Genius BUSINESS:**
Monitor 10 servers and 10 websites

Server Genius is a complete solution for identifying and managing user-based risks. Track remote access to your remote server and monitor RDP sessions now!
